

Bodhi Consulting

Delivering specialist data, technology and digital solutions

Build dynamic digital platforms in time and on budget

Our agile solution enables organisations to implement specialist teams and resources in order to design, deploy, integrate and manage the latest technology and digital platforms.

Whether you require full roll-out of digital transformation, or need a team of specialists for a specific project - we can help you build your ideal solution.

We work collaboratively in order to fully understand your requirements, challenges and aspirations. Our flexible approach is designed to integrate seamlessly with your organisation whilst ensuring you maintain full control of your programmes.

We provide specialist insight, resources and an exclusive network of subject-matter-experts to help you achieve your objectives and get the best results from your technology.

Save time and money

Our experts will present and deliver the most efficient and effective solutions.

Maintain control

We'll provide the specific support and specialisms you require and establish a clearly defined Service Level Agreement.

Integrated solutions

Our flexible solutions integrate seamlessly into your organisation.

Exceptional delivery

Deliver the best possible services, processes and experiences with the latest insight and digital platforms.

Dedicated support

A dedicated account director will work with you to fully support your organisation, projects and strategic objectives.

At a glance: **our methodology**

Engage

We will get to know your organisation, projects and strategic objectives in-depth to understand your aims and requirements.

Analyse

We will complete a full review your existing environment, considering the key elements of each project, including your timescales, budget and aspirations to define the right solution.

Agree

We will present solutions and provide guidance around outcomes, benefits and implications. We are flexible and adaptable to change as technologies and projects evolve in digital environments.

Implement

We will facilitate on-boarding of subject matter experts and resources. You will be assigned a dedicated Service Director that will manage project delivery to meet your specific requirements.

Partner

We will continue to consult you as a key partner, providing full handover, knowledge transfer and on-going support.

We're committed to...

- **Understanding your requirements in-depth**
- **Clearly defining the right outcomes**
- **Implementing the best solutions**
- **Providing on-going support**
